Parliament for using the same with complete discretion. A reply was sent to the Central Vigilance Commissioner on 26.4.1999 pointing out that under the Scheme, the MPs are required to identify and recommend to the District Collector, only such works which are based on locally felt needs leading to creation of durable assets. The guidelines give two illustrative lists of works— one that can be taken up under the scheme and other of works not permissible under the scheme. The District Collectors are required to implement only those works which are permissible under the guidelines and are technically feasible. Hence, if these guidelines are strictly complied with, there are little chances of misues of funds.
